

12 Gauge Extension Cords

Another item a lot of my guys are picking up from me today are my 12 gauge extension cords. The cords I have are made by Prime Industrial Cable. They have 82 strands of pure copper running from end to end so there's no aluminum alloy so they won't burn up or short out your expensive tools and they carry a full 20 amps even at 100 foot lengths. The ends are a 3 prong, u grounded with the brass connectors and are threaded on and then molded. On the female end there is a power indicator light so you know when there is power running through the cord. They also have the SJT jacket so they stay flexible down to 30 degrees below zero. I've got them available in 25, 50, or 100 foot lengths. What size do you work with? As far as price goes, we normally charge right at \$2.25 a foot but if you'll work with me on a small box of my cords i'll pay the freight and tax to get them to you on a 30 day account for just (refer to table below for individual pricing).

There are just a dozen cords per box on all sizes

Sizes and pricing are listed below

25 foot	\$49.90
50 foot	\$89.90
100 foot	\$149.90
